The Palo Alto Park Mutual Water Company has started laying the water mains along the Bayshore Freeway.

Don Reinoehl, engineer and Hayward Baker, contractor for this

work expect to complete their program in July, 1955.

Hayward Baker contracted the work for \$14,687.48.

Although this will be an added expense to the Palo Alto Park Mu-

tual Water Company, there are no expected assessments to be levied on the property owners at this time, according to Jessie Wilcox, secretary.

The superintendent, Harry Wilcox, believes this will give better water pressure and better fire protection for most of the water system.
