

The Journey

The Journey takes us through time past--

Childhood,

Youth

And friends--

It takes one through the painfully beautiful patterns of growth and decay.

The Journey takes one on journeys of the mind - headtrips

The Journey of the present is full of being --

Being, determined by the past,

Being determined by chance and accident.

It draws one close to self and causes focus into the future.

The future Journey is a headtrip,

An extension of the past through the present,

A continuum that holds the beginning and the end in connection.

The Journey is where you have been,

The Journey is where you are,

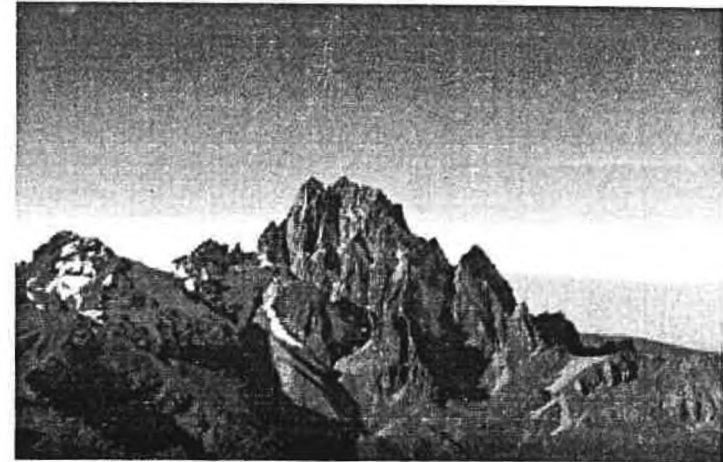

The Journey is where you are going.

The Journey, the Process, and the Way--

Merge into Unity
